<b>Environment Policy of DHL Freight</b>
<p>Being one of the most important logistic providers DHL Freight is aware of its social responsibility including particular liabilities towards environment. We consider environment protection, especially climate protection to be an issue on which we not only may but we really want to participate significantly.</p> <p>When performing our services we aim to do so the way that will secure a permanent sustainability of the environment. This is to be ensured keeping the following rules:</p> <ul style="list-style-type: none"> <li>• Environment protection is an integral part of our strategy and represents a significant part of our business performance evaluation.</li> <li>• Based on the close co-operation with our customers and business partners we enforce those actions that enable us to prevent and minimize negative impacts of our business on the environment and that also enable us to secure effective action of those activities that can not be eliminated immediately.</li> <li>• We follow relevant local and international rules as a minimum covering area of the environment protection and where possible we apply rules even above such legal requirements, where in the process we focus on pollution prevention targeted on permanent improvement of our environment profile.</li> <li>• Our employees are trained and motivated to work daily keeping the rules of environment protection at the same time.</li> <li>• We undertake a system evaluation of our performance in the area of the environment , we work on increasing effectiveness of our transport and logistic processes primarily with technological innovation and we put our effort on improvement continuously.</li> </ul> <p>Our Environment Policy is built and aligned with Deutsche Post DHL policy and its fulfillment primarily by meeting our common environmental goals.</p>
